YCWP QR Me

A Wordpress plugin developed with Google Charts APIs

Author: Nicola Mustone <mail@nicolamustone.it>
Author URI: http://www.nicolamustone.it
Tags: qr code, image, widget, easing, jquery, css, google code, google charts, steam, twitter, facebook, uri
Requires at least: 3.3.1
Tested up to: 3.3.1
Latest stable version: 1.3

Description

YCWP QR Me is a simple plugin that creates and displays QR Code in your blog pages. It provides also a configurable and useful widget and many shortcodes.
You can add your own QR Code in a widget ready sidebar, or in a post using shortcodes.
You can also automatically add your preconfigured QR Code at the end of each post and choose if you want to display it only on single posts pages.

Installation

1. Unzip the downloaded zip file;
2. Upload the 'ycwp-qr-me' folder into the 'wp-content/plugins/' directory of your WordPress site;
3. Activate **YCWP QR Me** from Plugins page.

Configuration

1. If necessary, configure YCWP QR Me settings from YCWP QR Me option in Settings menu.

2. If necessary, override custom style.
   2.1. Add a **'ycwp-qr-me.css'** file into your theme directory and put your custom CSS there.
   2.2. Add your custom CSS in your **'style.css'** file.
   2.3. Modify the **'ycwp-qr-me.css'** file located in 'wp-content/plugins/ycwp-qr-me/css/'.
3. Configure YCWP QR Me widget settings from Widget menu

Shortcodes
Please, see "YCWP QR Me Shortcodes.pdf" for details.
