ARGWA Free Autoresponder v4.0

Plug-in requires Wordpress 3.3+

Installation Instruction:

To installing this software simply navigate to your Plugins page, click the [Add] button at the top of the page, locate the file in the Browse box, and click to upload.

Software may also be installed to the '/plugins' folder by uploading the directory '/autoresponder-gwa' & files (unzipped from the plug-in package) directly by FTP.

Upgrade Instructions:

Deactivate current version of plug-in, replace all files in directory with contents from new package, re-activate plug-in.

NOTE: plug-in must be deactivated before upgrade, if you forget delete plug-in entirely and re-install. All leads and messages are safe unless GLOBAL DELETE is checked*

* Tick "Global Delete" at the bottom of the admin page to delete data when deactivating plug-in. Leave unchecked otherwise.

Software Setup:

Setup instructions are displayed on the plug-in admin page on the right.
