

Certificate of Security

issued 21st June, 2011
to Matej Koval

I, Gennady Kovshenin,
hereby certify that JoomlaWatch 1.2.17 component and
modules (up to and including trunk rev r415) for Joomla
CMS 1.5.23 and Joomla CMS 1.6.3, have been thoroughly
and manually tested for
SQL injections, XSS, remote file inclusion, HTTP header
injections, directory traversal and reconnaissance,
referrer spoofing, CSRF attacks and vulnerabilities via
manual line-by-line code review, and theoretical and
practical experimentation.

To the best of my knowledge, ability and belief
JoomlaWatch 1.2.17 component and modules (up to and
including trunk rev r415) for Joomla CMS 1.5.23 and
Joomla CMS 1.6.3 are safe and secure.
