

Setup Guide for installing the Wordpress 2FA Premium plugin

This guide explains how to install 2FA Premium plugin using miniOrange Console.

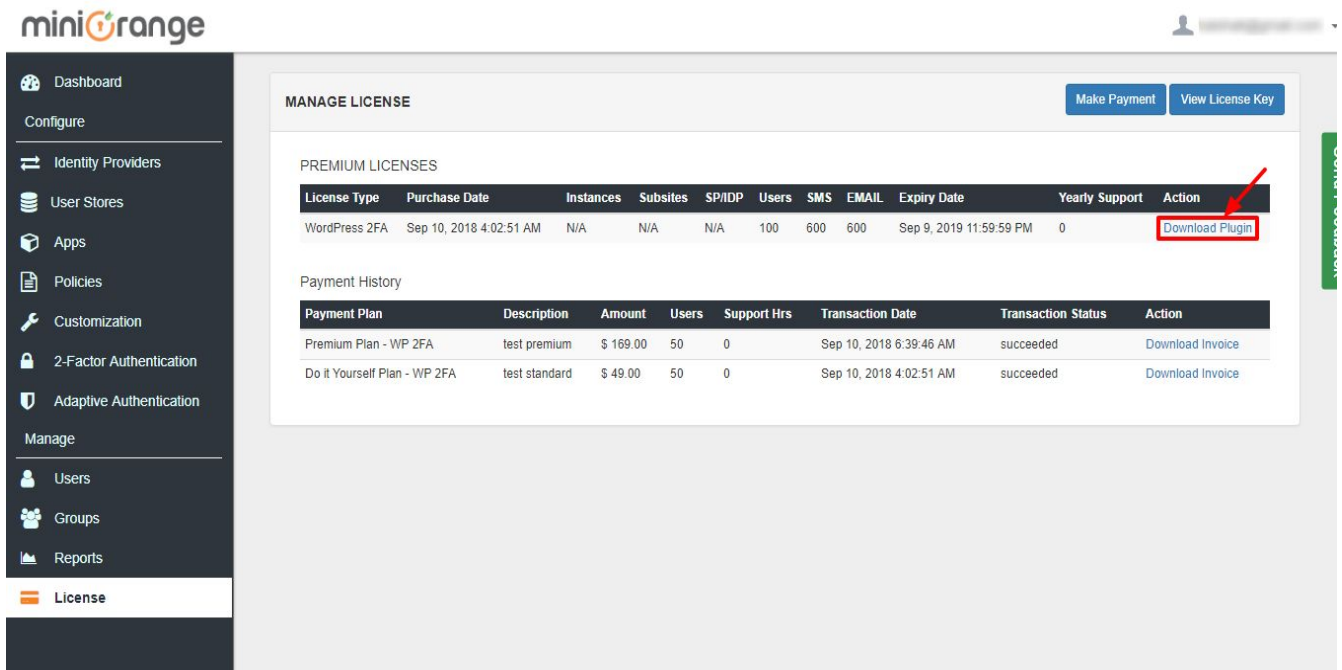

Step 1 – Downloading the 2FA Premium plugin from the miniOrange Console.

Login to the [miniOrange console](#)

In the left navigation bar, click on **License**.

Click on **Download Plugin** option which is shown in red rectangle.

The image shows the 'MANAGE LICENSE' dashboard in the miniOrange interface. On the left is a sidebar with navigation options: Dashboard, Configure, Identity Providers, User Stores, Apps, Policies, Customization, 2-Factor Authentication, Adaptive Authentication, Manage, Users, Groups, Reports, and License (highlighted). The main content area has two buttons at the top right: 'Make Payment' and 'View License Key'. Below these is a section titled 'PREMIUM LICENSES' containing a table with columns: License Type, Purchase Date, Instances, Subsites, SP/IDP, Users, SMS, EMAIL, Expiry Date, Yearly Support, and Action. A red box highlights the 'Download Plugin' link in the Action column for the 'WordPress 2FA' license. Below this is a 'Payment History' section with a table showing payment plans, descriptions, amounts, users, support hours, transaction dates, statuses, and actions (Download Invoice).

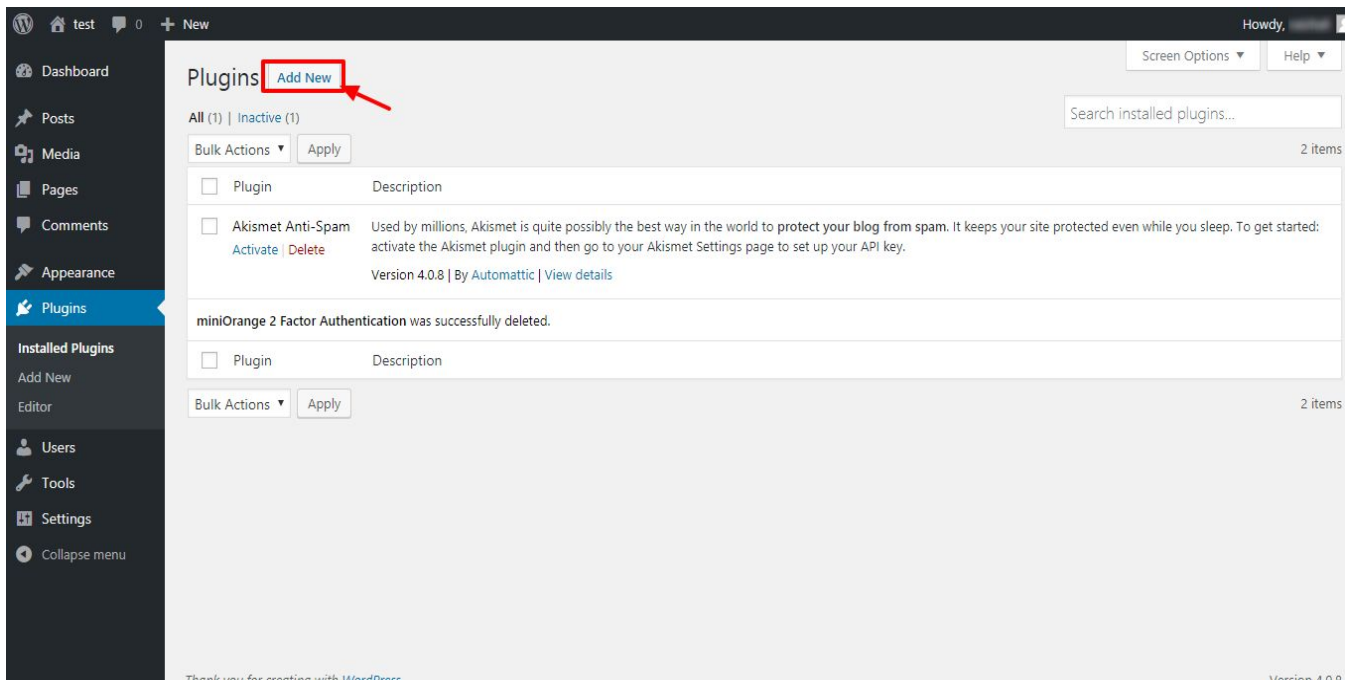

| License Type | Purchase Date | Instances | Subsites | SP/IDP | Users | SMS | EMAIL | Expiry Date | Yearly Support | Action |
|---------------|-------------------------|-----------|----------|--------|-------|-----|-------|-------------------------|----------------|---------------------------------|
| WordPress 2FA | Sep 10, 2018 4:02:51 AM | N/A | N/A | N/A | 100 | 600 | 600 | Sep 9, 2019 11:59:59 PM | 0 | Download Plugin |

| Payment Plan | Description | Amount | Users | Support Hrs | Transaction Date | Transaction Status | Action |
|------------------------------|---------------|-----------|-------|-------------|-------------------------|--------------------|----------------------------------|
| Premium Plan - WP 2FA | test premium | \$ 169.00 | 50 | 0 | Sep 10, 2018 6:39:46 AM | succeeded | Download Invoice |
| Do it Yourself Plan - WP 2FA | test standard | \$ 49.00 | 50 | 0 | Sep 10, 2018 4:02:51 AM | succeeded | Download Invoice |

After downloading the plugin go to wordpress admin dashboard and delete the free plugin.

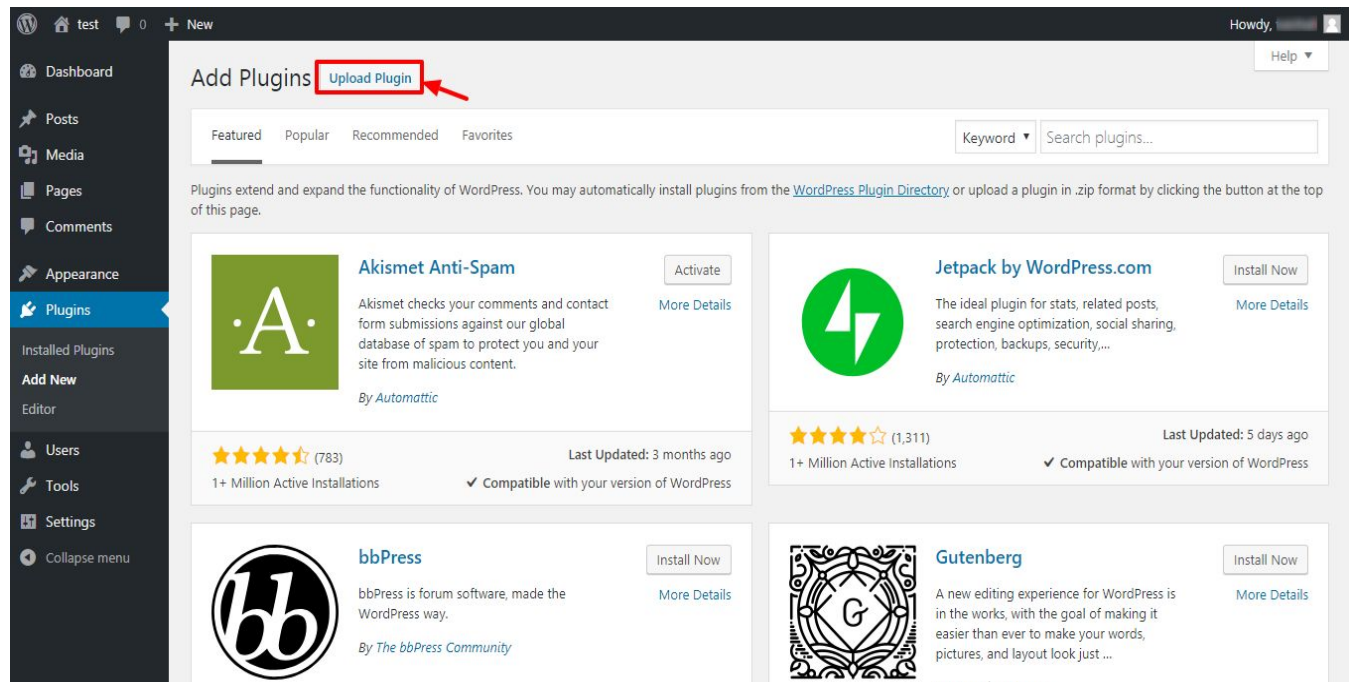

Step 2 – Installing the 2FA Premium plugin from the Wordpress Dashboard.

Click on **Add New** plugin.

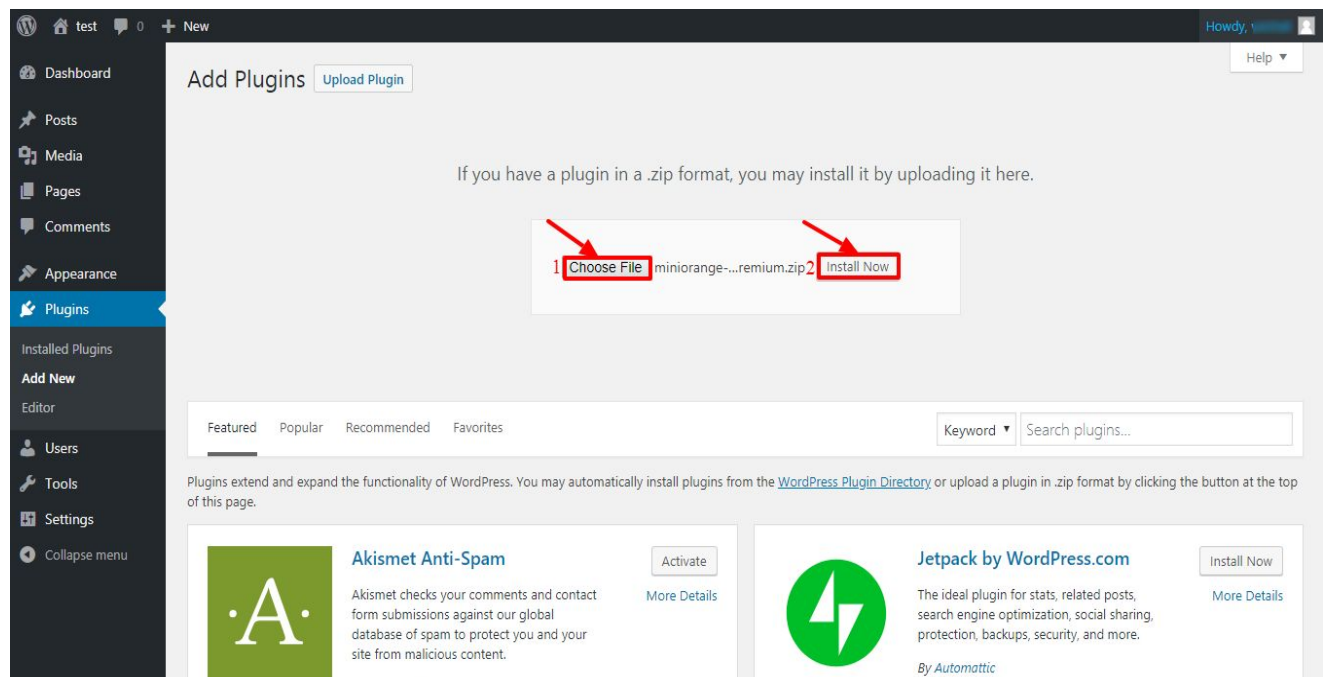

The image shows the WordPress 'Plugins' dashboard. The left sidebar has a menu with: Dashboard, Posts, Media, Pages, Comments, Appearance, Plugins (highlighted), Installed Plugins, Add New, Editor, Users, Tools, Settings, and Collapse menu. The main content area is titled 'Plugins' and has a red box around the 'Add New' link with a red arrow pointing to it. Below the title are filters for 'All (1)' and 'Inactive (1)', and buttons for 'Bulk Actions' and 'Apply'. A search bar for 'Search installed plugins...' is on the right. The plugin list shows 'Akismet Anti-Spam' with its description and version. A message states 'miniOrange 2 Factor Authentication was successfully deleted.' Below this is another empty plugin entry with 'Bulk Actions' and 'Apply' buttons.

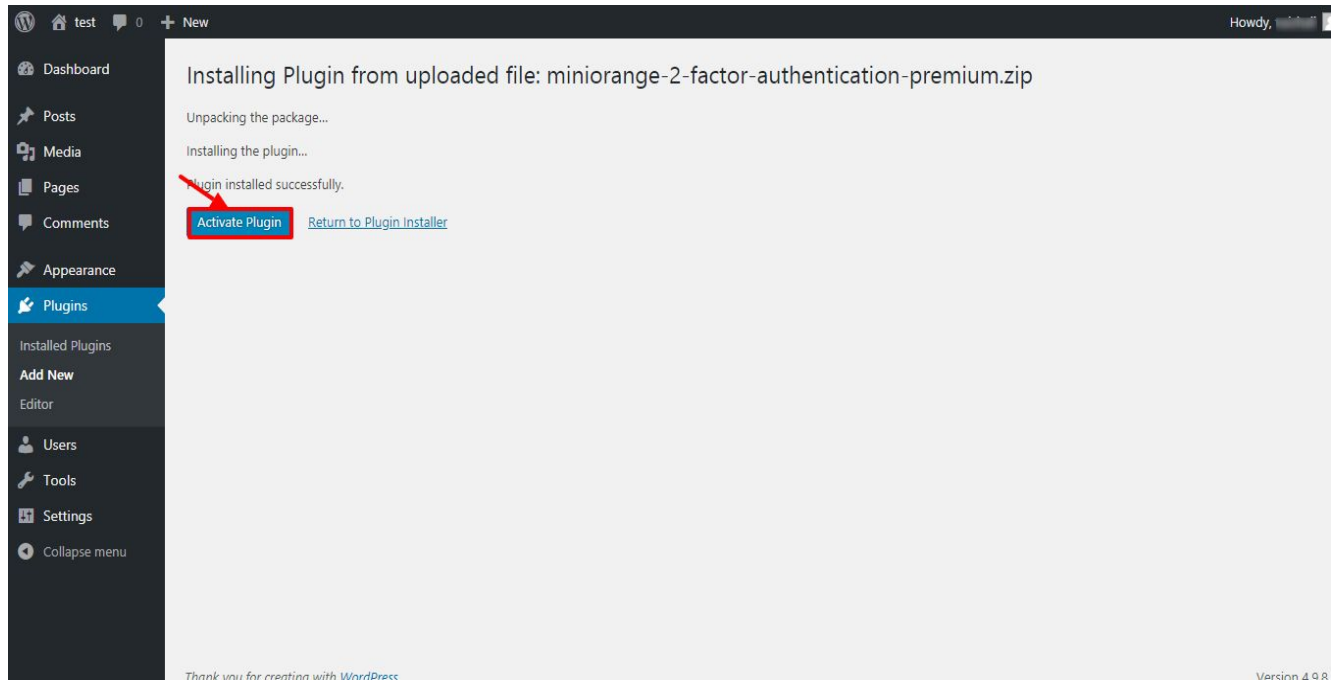

Click on **Upload Plugin**.

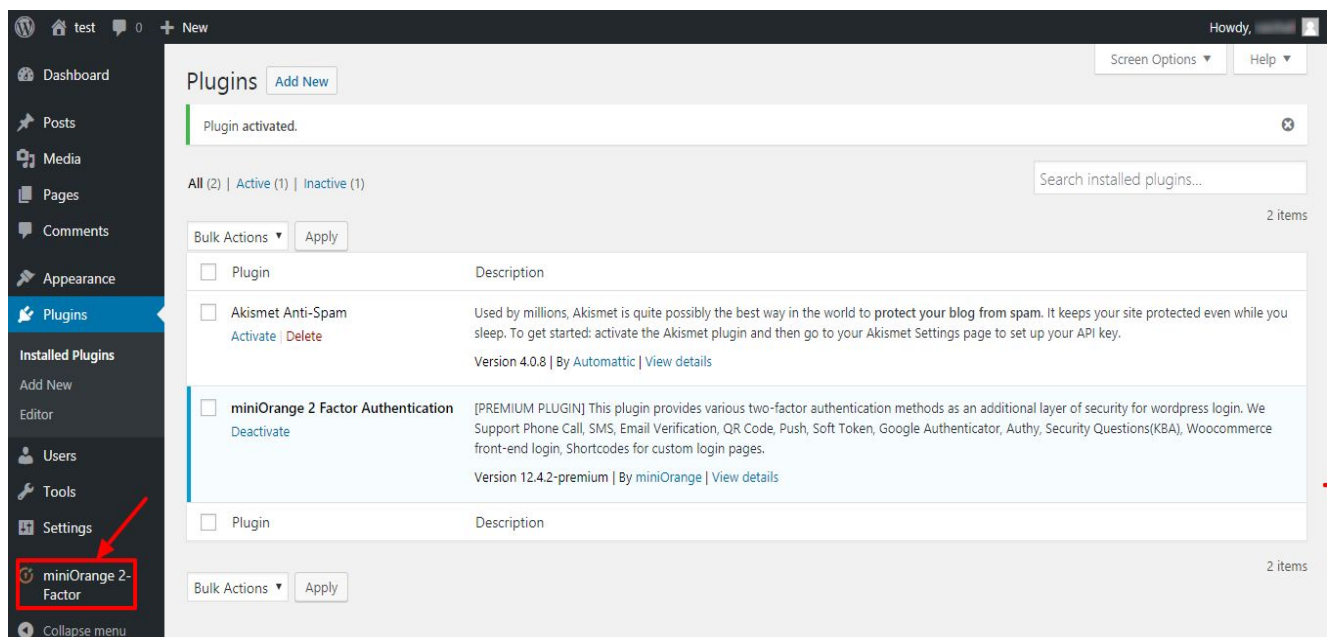

Click on **Choose file** and Choose the file which you have downloaded after making payment and click on **Install Now** button.

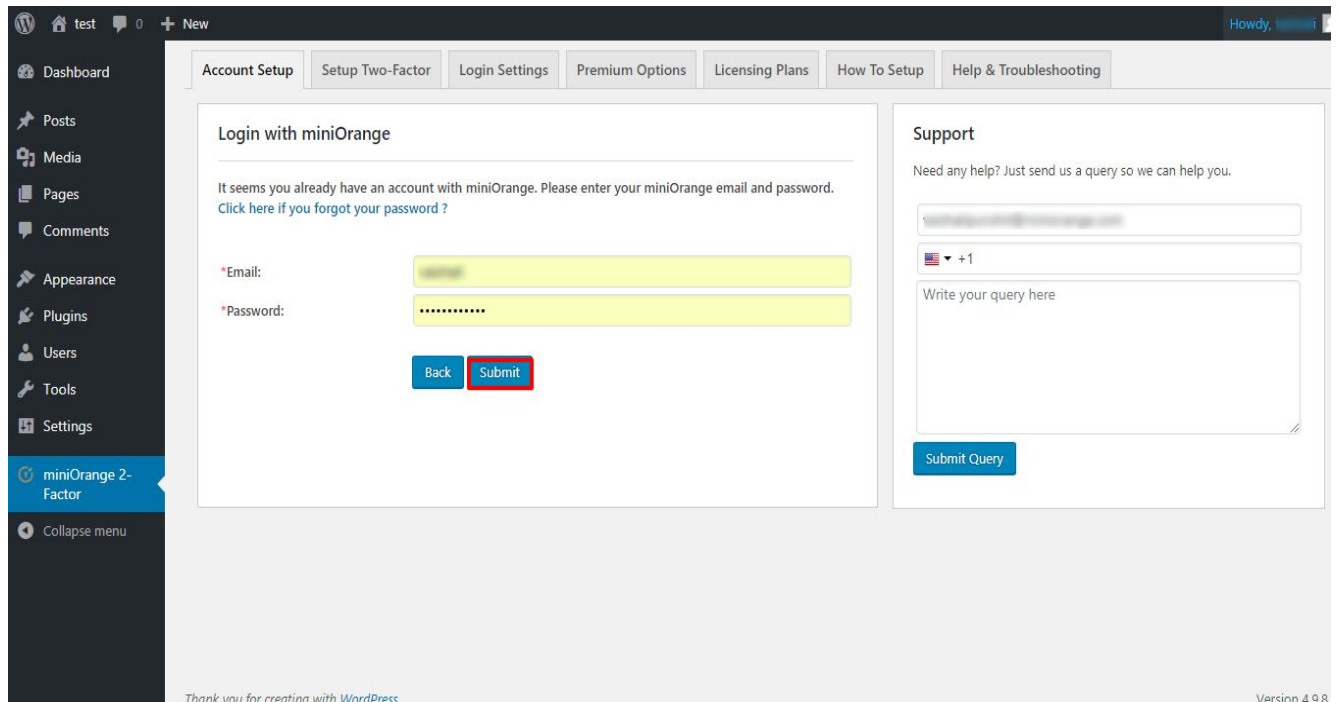

Click on **Activate Plugin** button It will activate the Standard/Premium plugin.

Then click the **miniOrange 2-Factor** on wordpress sidebar.

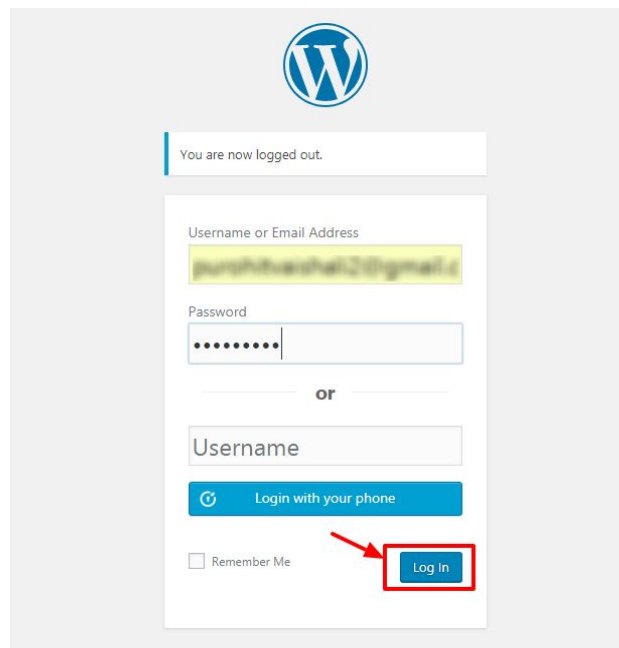

Then you login with your same credentials which you made payment.

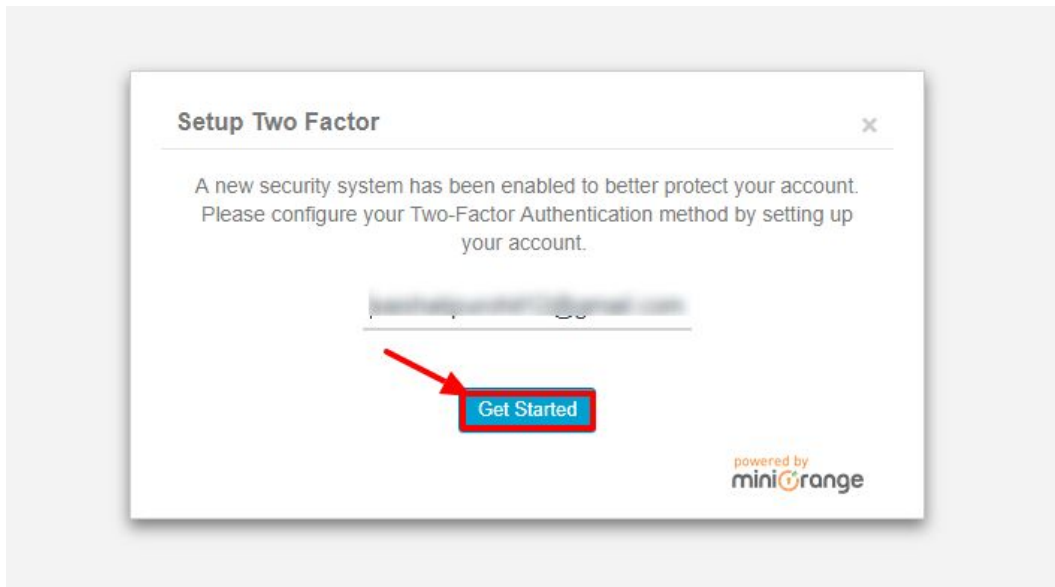

Step 3 – Two-Factor Setup by Users.

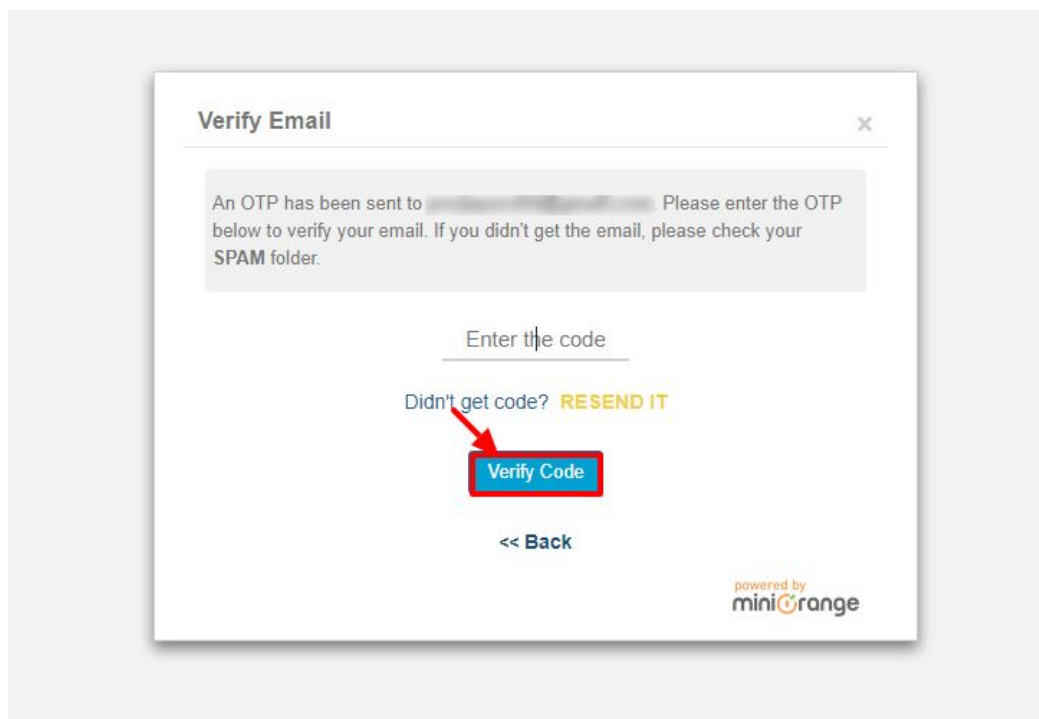

After the Premium plugin has been installed, when the user tries to login, the user will be entering his/her Wordpress username and password.

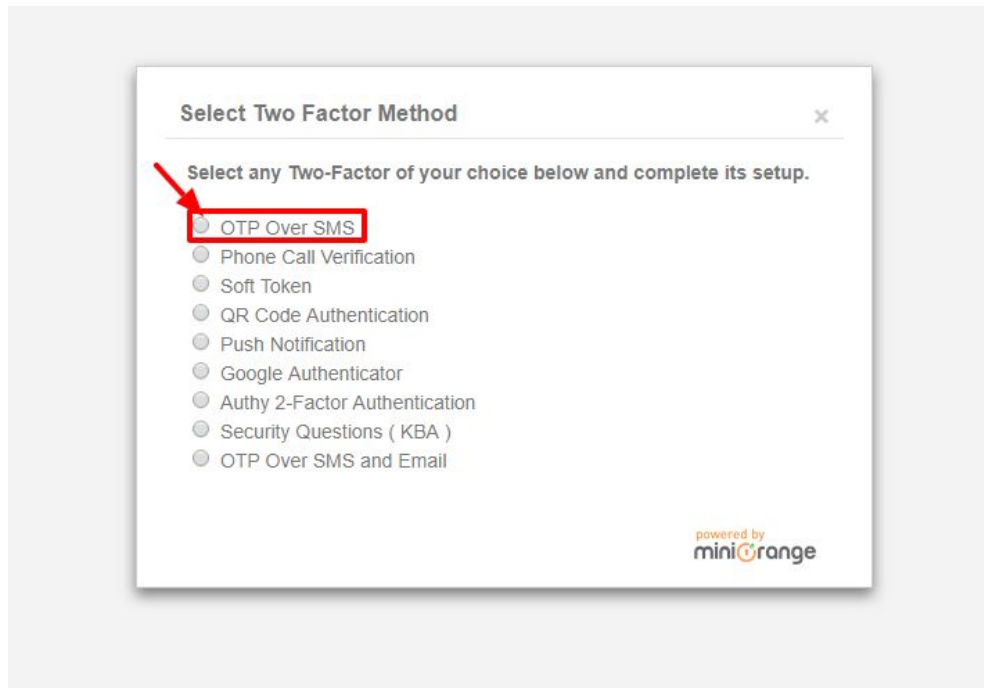

User will be entering the credential.

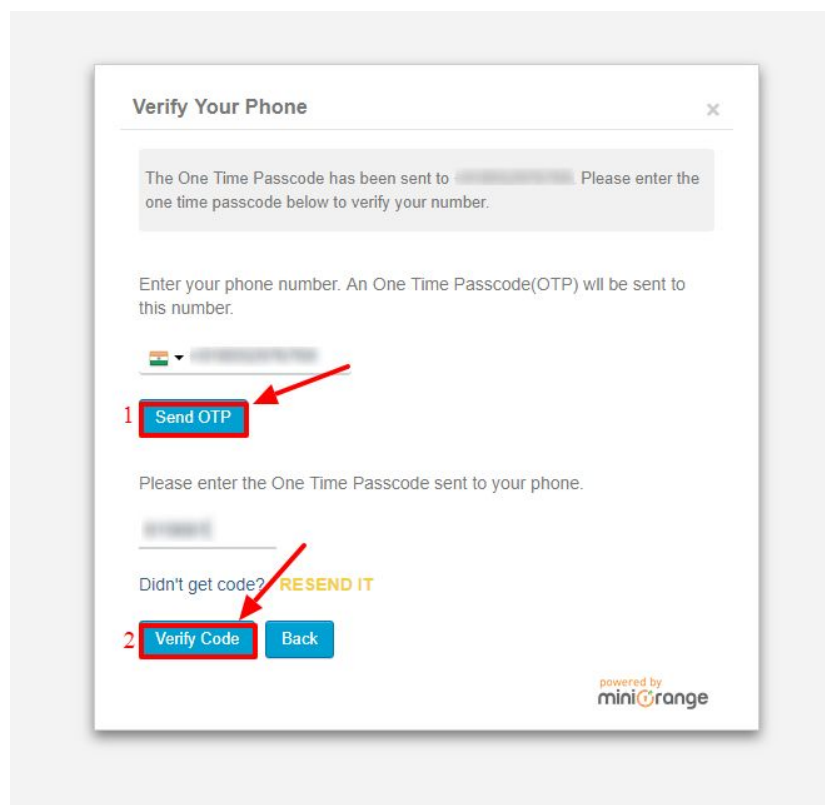

User will get OTP over email-id enter OTP and Click on **Verify Code**.

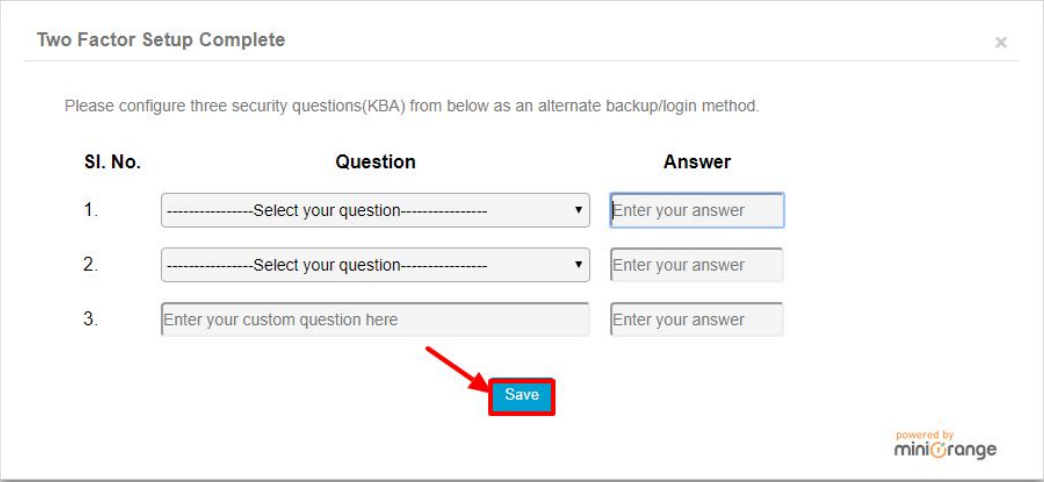

After the successful validation of OTP, he will be asked to select his 2nd factor method of choice.

If User selects OTP Over SMS, User will be asked to set it up by entering his/her phone number, and User will be asked to validate his/her phone number by entering the OTP sent to his/her mobile number.

After phone verification User will be asked to set up **KBA** as his/her backup method.

Two Factor Setup Complete ×

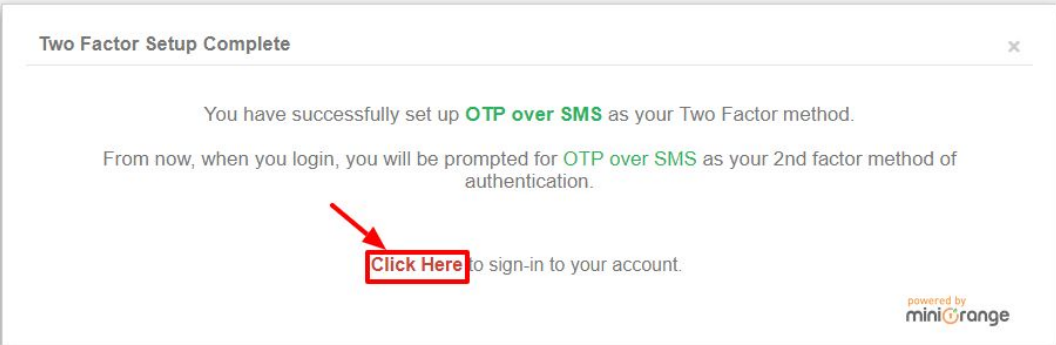

Please configure three security questions(KBA) from below as an alternate backup/login method.

| Sl. No. | Question | Answer |
|---------|----------------------------------|-------------------|
| 1. | -----Select your question----- ▾ | Enter your answer |
| 2. | -----Select your question----- ▾ | Enter your answer |
| 3. | Enter your custom question here | Enter your answer |
