Passive Income Generation

Contents

Introduction

Congratulations on downloading NukePiG one of the many useful modules released from the BlogPiG™ stable of WordPress automation tools.

We all make mistakes, especially when using mass automation apps like the BlogPiG suite of passive income generation tools. Imagine importing over 3000 schedule posts only to find out that you've a typo in every affiliate URL. Even with WordPress 2.5 new bulk deletion feature you could only delete 10 posts at a time, that's a lot of clicks!

NukePiG allows you one-click deletion of all your blog posts, pages, tags, categories or links, no messing around in the database, just select what you want to reset and hit NUKE! Within seconds you can reset an entire blog or simply just certain content elements, it's your call.

The only way to achieve a bulk delete until now was to go into the database itself and manually truncate the tables directly using SQL, not exactly a slick workaround.

Enter Nuke PiG. Simply check the boxes for the content items you want deleted from:

- Posts
- Pages
- Tags
- Categories
- Links

Then hit the NUKE button and within a couple of seconds your blog is ready to go again with a fresh batch of content items.

In this user guide you'll find the full details of exactly how to install, operate and gain the maximum advantage from your NukePiG plugin. If you have any questions don't hesitate to get in touch, details are at the end of this guide.

Gary

Owner BlogPiG.com

Requirements

- WordPress 2.5 or later
  (For security you should always try and keep your WordPress installation up to date. Download it here)
- PHP4/5

Installation

If you haven't already downloaded NukePiG from the BlogPiG website do so at
www.blogpig.com/products/

1. Unzip the NukePiG zip file, it will contain one folder called **wp-nuke-pig**

2. Use an FTP client to upload the unzipped wp-nuke-pig directory into your WordPress **/wp-content/plugins/** folder

3. Logon to your WordPress administration area and go to the PLUGINS tab, scroll down to NukePiG and click to activate the plugin

	WP Tag PiG	1.0.2.334	This plugin allows the user manage and assign tags to blog posts. *By BlogPiG.*	Activate

4. After activation a new BlogPiG tab will appear in your blog's administration area. This will be in the top bar in WordPress 2.6 or at the bottom of the sidebar in WordPress 2.7. From here you can access the NukePiG admin area.

Registration

NukePiG requires free registration before use. Simply enter your email address and name and wait a minute or two for the confirmation email to arrive. Click on the link in the confirmation email and your plugin will now be ready to use by clicking the activate button in your email.

If you have previously registered NukePiG or any of the other BlogPiG™ plugins simply use the same email address as you used previously and the plugin will immediately activate. There is no need to wait for another email or click on any links. (Unless you have since unsubscribed)

Why do we require registration?

Primarily to let you know about updates to your plugins or new releases of other plugins from BlogPiG™ or occasionally BlogPiG™ partners. I completely disapprove of spam and I guarantee that your details will never be sold traded.

Settings

There settings page is extremely simple to configure. Here is a screenshot of exactly what you will see:

Content

Use with care as these actions can not be undone! Once nuked, the content can not be brought back!

Nuke All Pages: ☐ **1**

Nuke All Posts: ☐

Nuke All Tags: ☐

Nuke All Categories: ☐

Nuke All Comments: ☐

Nuke All CommentPiG Comments: ☐ **2**

Nuke All Links: ☐

Nuke All Link Categories: ☐

Nuke Selected Content »

Choose whether you wish to delete ALL pages, posts, tags, categories, comments links or link categories. You can select any combination by ticking multiple boxes before hitting the 'nuke selected content' button.

'Nuke all CommentPiG Comments' is a special selection only necessary for users of CommentPiG the WordPress Comment Simulator. You can read more about CommentPiG **here.**

When you press the 'Nuke Selected Comment' button you will see another box asking if you are sure you want to proceed. As soon as you click yes ALL the content types you selected will be deleted. **PLEASE USE WITH CARE**.

Support

Product support is available 24x7 by logging in to our support desk at http://BlogPiG.com/support. Simply open a new ticket and leave a detailed description of issues you are having and we'll get it sorted right away.

In addition we have a forum available at http://BlogPiG.com/forum where you can also ask questions or even make suggestions for new features and improvements.
