

RealityShop 3D – Installation & User Guide

Installation

You can install the **RealityShop 3D** plugin in two ways:

Method 1: Install from WordPress Dashboard

1. Go to **WordPress Dashboard → Plugins → Add New**
2. Search for “**RealityShop 3D**”
3. Click **Install Now**
4. Click **Activate**

Method 2: Manual Installation

1. Download the plugin ZIP file.
2. Go to **Plugins → Add New → Upload Plugin**
3. Upload the ZIP file.
4. Click **Install Now** and then **Activate**.

After activation, a new sidebar menu with the RealityShop logo will appear in your WordPress dashboard.

Plugin Menu Overview

The plugin includes four main sections:

1. Dashboard

From the Dashboard, you can:

- View all added items
- Add new items
- Edit existing items
- Delete items

Each item can be either:

- **PNG 360 View**

RealityShop 3D – Installation & User Guide

- Upload multiple PNG images to create a smooth 360° rotation experience.
- The more images you upload, the smoother the rotation.
- **3D Model**
 - Supported formats:
 - **GLB** (for Android devices)
 - **GLTF** (for Android devices)
 - **USDZ** (for iOS devices)

You can also create color variants for each item.

2. Settings

In the Settings section, you have access to the following options:

- **Minify Codes**
Removes unnecessary spaces and comments to improve performance.
- **Lazy Loading**
Improves page loading speed by loading 3D models and 360 assets only when needed.
- **Display in Popup**
By default, 3D models open inside a modal container.
When enabled, 3D models and 360 views will open inside a popup after the user clicks the display button.
- **Delete All Data on Uninstall**
Completely removes plugin data and database tables when the plugin is deleted.

3. Premium

In the Premium section, you can check which of our premium plugins are currently:

- Activated
- Deactivated

4. Documentation

This PDF can be downloaded by clicking this submenu.

How to Set Up 3D or 360 View on a Product

Follow these steps to display a 3D model or 360 view on a product page:

Step 1: Add an Item

Go to **RealityShop Dashboard** and add a new item (PNG 360 or 3D Model).

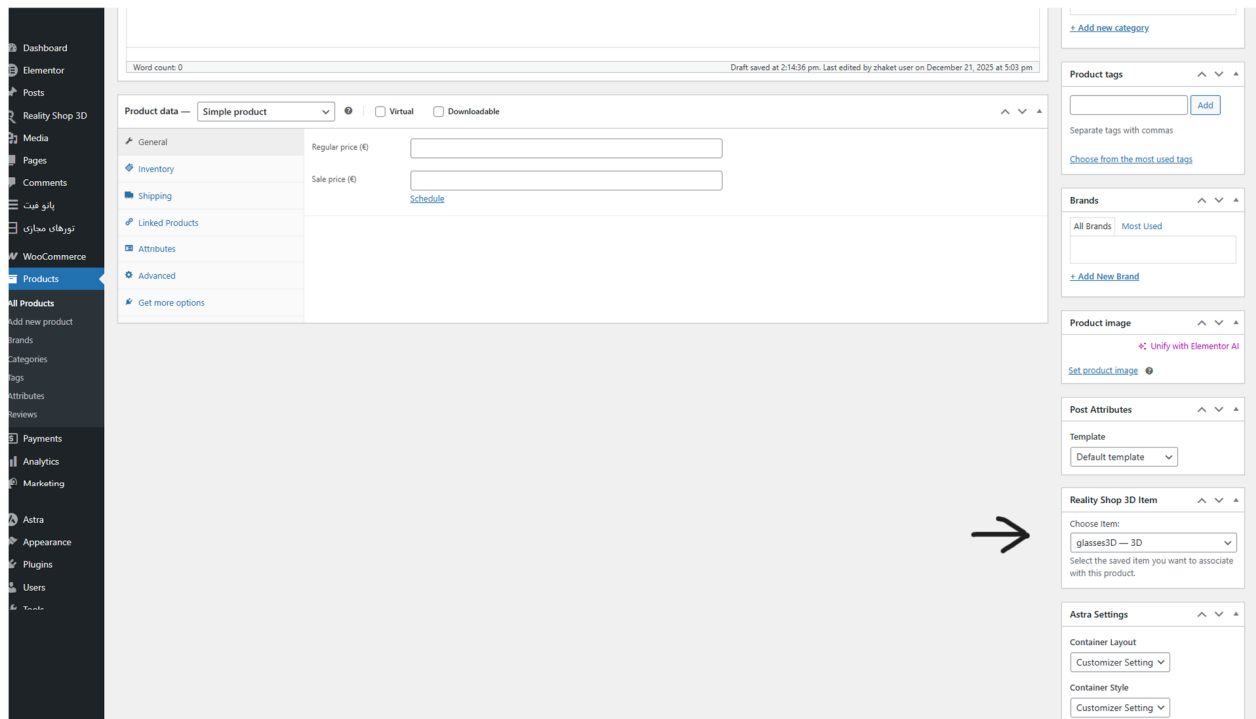

Step 2: Assign the Item to a Product

1. Open the desired product from the WordPress dashboard.

RealityShop 3D – Installation & User Guide

2. Locate the **RealityShop** section.
3. Select the appropriate item for that product.

Step 3: Add the Elementor Widget, Shortcode, or Gutenberg Block

Elementor widget:

1. Edit the single product page with Elementor.
2. Add the **RealityShop** widget.
3. Customize the display settings as needed.

Shortcode:

1. Add a shortcode block to the page.
2. Use the custom item shortcode to display a specific item, or use the shortcode below to display the assigned item for the product:
