

# StockSync Sheets — Page Viewer Guide

Use this page to preview rows and run Dry Run or Live Sync updates to WooCommerce stock.

1

## Sheets to Include

Tick the sheet(s) you want to run. Use Dry Run first to simulate only. Use Live Sync to apply real stock updates.

2

## Next Scheduled Sync

Shows the next WP-Cron run time per sheet. Set schedules in Settings (Stock). 'Not scheduled' means no schedule is set.

3

## Filter by Product Category

Optional. Select one or more WooCommerce categories to limit preview + sync. Leave blank to include all products.

4

## Apply Filter / Clear Selection

After selecting categories, click Apply Filter. Use Clear Selection to reset back to all categories.

5

## Sync Selected Sheets to WooCommerce

Runs the selected sheet(s) using your Dry Run / Live Sync selections. Recommended: Dry Run → check log → Live Sync.

6

## Sheets Results (Load Sheet Preview)

Click Load Sheet Preview to fetch the latest rows from your configured sheets so you can visually confirm headers + values.

7

## Search Products

Helper search tool to find WooCommerce products quickly (useful for checking products during manual matching). It does not change stock.

8

## Sync Log / Results

Review what matched, what updated, what was skipped, and any items sent to Manual Review (if enabled in your build).
